Preface

The Annual Dzongkhag Statistics of Haa is the second in the series of publications. It attempts to provide comprehensive statistics of Haa Dzongkhag and will be published annually.

The report contains statistics on demographic and socio-economic, environment, culture, local governance and infrastructures of the Dzongkhag. The statistical data for this publication are collected and compiled from various sectors and through primary sources.

We hope that this report will serve as a source of information and guiding tool for micro-level planning and decision-making in the Dzongkhag. Statistics office, Haa would like to thank and acknowledge the support and cooperation of all sector heads concerned for providing timely information for this report. Without their support, this publication would not have been possible. Through this initiative, we also hope that the maintenance of sectoral information and updation in the Dzongkhag will become more systematic and efficient henceforth.

Since this report is the second publication and with information source being from numerous sectors, we expect there may be certain deficiencies in terms of coverage and updation. However, there will be continuous efforts made to improve its coverage and quality in our future publications. Your comments and suggestions in this regard will be highly appreciated.

Haa Dzongkhag

Background

Haa Dzongkhag, encompassing a total area of 1899.02 Sq.Km with a population of little over 13,703 with an altitude ranging from 1000-5600 meters above the sea level,

The Dzongkhag is administratively divided into six Gewogs namely, Bje, Eusu, Kar-tshog, Samar, Sombaykha and Gakedling. Due to hard physical barriers, Dzongkhag is administratively decentralized to one Drungkhag which is expected to address most of the constraint faced by the people of two Gewogs of Sombaykha and Gakedling.

The Dzongkhag is characterized by a rugged and mountainous terrain, and communities are located in remote settlements. The Dzongkhag is topographically divided into north and south. Bje, Kar-tshog, Eusu and Samar Gewogs lies in the north while two Gewogs Gaykedling and Sombaykha, and two villages of Samar Gewog namely Sertena and Phentana falls in the south which are separated from north by Tergola and Sela pass.

Haa is one of the least populated Dzongkhag after Gasa with a population of 11,648 only as per Population Housing Census of Bhutan (PHCB) 2005. The vegetation ranges from broad leafed forest in the southern Gewogs to coniferous and sub alpine in the central, and pure alpine vegetation in the high lands of the northern Gewogs. The Dzongkhag is endowed with very rich flora and fauna and about 74% of the Dzongkhag is under forest cover.

It has cold and dry winters and wet and warm summers. In winters, the temperature drops down to minus seven degree Celsius at the extreme minimum. The Dzongkhag receives snow fall several times in a year from late October till April.

Haa being located in very high altitude, the cultivatable agricultural land forms only around 2 % of the total area of the Dzongkhag. Since the Dzongkhag is constrained by the prolonged winter and short growing seasons. Most of the Gewogs own dry land areas and pasture lands. Majority of the people depend on livestock and business. Livestock rearing constitute an important economic activity in the Dzongkhag, with a majority of the northern Gewogs depending on livestock products such as butter, cheese and yak meat for their livelihood. Wheat is the main cereal crop grown in the Dzongkhag, and other crop includes barley and buckwheat. In the south cardamom

and ginger constitutes the principal cash crops and in north potato serves as main cash crops, while apples and vegetables are also cultivated on a moderate scale.

The Dzongkhag has good education coverage with one higher secondary school, three Lower secondary schools, three primary schools three community schools and two extended Class Rooms with total enrollments of 3258 students in 2011.

The Dzongkhag does not have full fledged district hospital at the moment. Therefore, the Bali BHU-I functions as the Dzongkhag Hospital supported by 3 BHUs Graded II. Some cases are also referred to IMTRAT military hospital, rendering public health services in the Dzongkhag.

Bje, Kar-tshog, Eusu and northern part of Samar Gewogs are within radius of 15 Kilometers from Dzongkhag administration and have fairly good road network and other Facilities like electricity, telephones connection, water supply, health and education coverage with better living conditions. Sombaykha, Gaykedling and southern villages of Samar Gewogs on the other hand are very remote and very relatively poor. It will take four and five days official walk to reach Gewog centers and tends scatters settlements, rugged terrain and lack of motor-able roads pose considerable problem in delivering developmental services to the peoples of those Gewogs, we are expected to have road network connecting two Gewog offices latest by end of 2013.

In 2002, subsequent to the 79th session of the National Assembly, the valley was opened to foreign tourism. With the cultural sites of 40 lakhangs, which are owned by Government, Community and private individual.
