Objectives and Structure

Part I (Summary)

- | | |
|--|----|
| I. Summary of Livestock Population 2017 | I |
| II. Summary of Livestock production 2017 | II |

Part II (Dzongkhag wise livestock population and production by various category) 1-27

Population (2018)

- Cattle Breeds (including Buffalo, Yak and Zo/Zom)
- Equines (Horse, Mule and Donkey)
- Pig and Poultry
- Sheep and Goat
- Cat and Dog (only utility dogs)

Production (2018)

- Dairy product produced and sold
- Meat product produced and sold
- Egg, wool and honey product produced and sold

Part III (Geog wise livestock population and production information) 28 - 324

Population

- Cattle population including (Buffalo, Yak and Zo-Zom)
- Equine (horse, mule and donkey)
- Pig and Poultry population
- Sheep and Goat population
- Cat and dog (utility/pet)population

Production

- Dairy product produced and sold
- Meat product produced and sold
- Egg, wool and honey product produced and sold

Part IV (Government Livestock Farms). 325

- Population and production

Foreword

Livestock Statistics 2018 is the 13th series of statistics publication by the Department of Livestock (DoL) in its comprehensive effort to record information on livestock population and production in the country for better planning and efficient resource utilization.

The Publication is presented in four section:

1. Part I contains overall summary (Livestock Population and Production) in 20 Dzongkhags of Bhutan.
2. Part II contains detailed livestock population and production data at Dzongkhag level (20 Dzongkhag).
3. Part III contains livestock population and production data at the Geog level (205).
4. Part IV contains data on the Government livestock farms.

We believe that this statistical data presented will be useful, not only for the planners, researchers, development works, but also for the policy makers. Further, the Department of Livestock in its upcoming annual report for 2018-2019 will provide a "Snap shot" of some vital statistical analysis and provide the rationale for the dynamics of the livestock population and production. It is our hope and aspiration that in making data available, it will be useful to all stakeholders a holistic development, standard by making informed decisions.

I would like to extend my heartiest appreciation to all my colleagues in the Department and the Dzongkhag livestock sector for their support, and in particular to the Information Management Section (IMS) under the Department of Livestock for their invaluable efforts in bringing out this useful and informative publication in time.

(Dr. Pashi Samdup)
DIRECTOR GENERAL

Methodological Processes

It is imperative that while collecting data, the process, methodology and validation are crucial to get valid data which can fulfill the objectives

- To record and maintain reliable information on livestock population and production for planning and monitoring of livestock development programmes.
- To provide data for preparation of plans and programs and to understand trends in livestock population and production.

Data collection, validation

We designed a data collecting format (questionnaire) through participatory approach and fine tuned the format for the most relevant information record. Data was collected from 205 geogs of the country at house hold level by the livestock extension personnel and also from the central farms of the Department. The data collection, validation and compilation is first done at the Geog level by the extension staff who then forward to Dzongkhag Livestock Officer where further validation is done. The Information Management section (IMS), under the Department of livestock, head quarter receives the final data for further validation, compilation and publication.

Limitation on the data.

As in any survey there are bound to be some limitations. Some of the limitations are as the respondents are farmers with different social and educational background, there will be some response errors although various techniques are used to obtain authentic data as far as possible. The farmers can not keep records of production figures due to low literacy level.

- Under reporting of population and production due to fear of taxation is another source of error.
- Incompetent data providers can be another source of error.

The Department of Livestock, none the less continue to strive to improve on the methodologies and provide authentic information for our end users

Namgay Dorji
Principal Planning Officer
HEAD IMS, Department of Livestock

Part I

(Summary Livestock Population and Production 2018)
