Table of Contents

Foreword by Director General
Objectives and Structure

Part I (Summary)

- I . Summary of Livestock Population 2016 I
- II. Summary of Livestock production 2016 II

Part II (Dzongkhag wise livestock population and production by various category) 1-26

Population

- Improved Cattle Breeds 1-5
- Local Cattle Breeds including (Yak, Zo/Zom and Buffalo) 6-15
- Equines (Horse, Mule and Donkey) 16
- Pig and Poultry 17-18
- Sheep and Goat 19
- Cat and Dog (only utility dogs) 20

Production

- Dairy product produced and sold 21-23
- Meat product produced and sold 24-25
- Egg , Wool and Honey product produced and sold 26

Part III (Geog wise livestock population and production information) 27 - 242

Population

- Cattle population including (Yak, Zo/Zom and Buffalo) 27-131
- Equine (Horse, Mule and Donkey) 132-140
- Pig and Poultry population 141-158
- Sheep and goat population 159-176
- Cat and dog (utility/pet)population 177-185

Production

- Dairy product produced and sold 186-214
- Meat product produced and sold 215- 232
- Egg, wool and honey product produced and sold 233-242

Part IV (Government Livestock Farms and NCAH). 243-246

- Population and production
- Vaccine Distribution (NCAH)

Foreword

Livestock Statistics 2016 is the 11th series of statistics publication by the Department of Livestock (DoL) in its comprehensive effort to record information on livestock population and production in the country for better planning and efficient resource utilization.

The Publication is presented in four section:

- Part I contains the "**summary**" (Livestock Population and Production) in Bhutan (Dzongkhags and Livestock Government Farms).
- Part II contains "**detailed**" livestock population and production data only at **Dzongkhag level**.
- Part III contains "**detailed**" population and production data at the **Geog level**.
- Part IV contains data in the **Government livestock farms** and central program.

We believe that this statistical data presented will be useful, not only for the planners, researchers, developmental workers, but also for the policy makers. Further, the Department of Livestock in its upcoming annual report for 2016-2017 will provide a "Snap shot" of some vital statistical analysis and provide the rationale for the dynamics of the livestock population and production. It is our hope and aspiration that in making data available, it will be useful to all stakeholders to pursue a holistic development, paradigm by making informed decisions.

I would like to extend my heartiest appreciation to all my colleagues in the Department and the Dzongkhag livestock sector for their support, and in particular to the Information Management Section (IMS) under the Department of Livestock for their invaluable efforts in bringing out this useful and informative publication in time.

(Dr. Tashi Samdup)
DIRECTOR GENERAL

NOTE

Rational and Methodological Processes

It is imperative that while collecting data, for statistical analysis and planning the propose intended for should be clearly defined. Besides it is also important to be transparent in the approaches used and inherent existing limitations.

1. The main objectives are:

- To record and maintain reliable information on livestock population and production for planning and monitoring of livestock development programmes.
- To provide data for preparation of plans and programs and to understand trends in livestock population and production.

2. Data collection, validation

We designed a data collecting format (questionnaire) through participatory approach and fine tuned the format for the most relevant information record. Data was collected from 205 geogs of the country at house hold level by the livestock extension personnel and also from the central farms of the Department. The data collection, validation and compilation is first done at the Geog level by the extension staff who then forward to Dzongkhag Livestock Officer where further validation is done. The Information Management section (IMS), under the Department of livestock, head quarter receives the final data for further validation, compilation and publication.

3. Limitation on the data.

As in any survey there are bound to be some limitations for example as the respondents are farmers with different social and educational background, there will be some response errors although various techniques are used to obtain authentic data as far as possible. The farmers can not keep farm records of production figures due to low literacy level. Other possible limitations including under reporting of population and production due to fear of taxation is another source of error, incompetent data providers can be another source of error.

The Department of Livestock, will continue to strive to improve on the methodologies and provide authentic information for our end users

Namgay Dorji
Principal Planning Officer
(Head IMS)
Department of Livestock

Livestock population Summary (2016)

| Dzongkhag | Cattle | Mithun ^(a) | Yak ^(b) | Zo-Zom ^(c) | Buffalo | Equine | Pig | Poultry | Sheep | Goat | Cat | Dog Utility/Pet |

NOTE

NOTE

Feed Blocks: An Alternative Feed Intervention.

Feed Block:

Compressed/cubed block of straw/stover enriched with molasses, oil cakes, minerals and vitamins.

Benefits

- Reduced bulkiness
- Easy storage and handling
- Easy transport
- Complete alternative feed
