| Summary of Livestock Population and production 2009 | II |

## **Section I (Dzongkhag wise livestock population and production)**

|  |    |
|--|----|
| Jersey pure by various category        | 1  |
| Jersey cross by various category       | 2  |
| Brown swiss pure by various category   | 3  |
| Brown swiss cross by various category  | 4  |
| Mithun pure by various category        | 5  |
| Nublang/Thrabum by various category    | 6  |
| Jatsha/Jatsham by various category     | 7  |
| Yanku/Yankum by various category       | 8  |
| Doeb/Doebum by various category        | 9  |
| Doethra/Doethrabum by various category | 10 |
| Jaba by various category               | 11 |
| Yak by various category                | 12 |
| Goleng by various category             | 13 |
| Buffalo by various category            | 14 |
| Horse, Mule and Donkey                 | 15 |
| Pig (Local and Improved)               | 16 |
| Poultry (Local and Improved)           | 17 |
| Sheep and Goat by sex                  | 18 |
| Cat and Dog (only utility dogs)        | 19 |
| Dairy production                       | 20 |
| Meat production                        | 21 |
| Egg and Wool production                | 22 |

## **Section II (Geog wise livestock population and production)**

|   |         |
|---|---------|
| Geog wise cattle population by breed and category | 23-87   |
| Geog wise yak population by category              | 88-90   |
| Geog wise buffalo population by category          | 91-93   |
| Geog wise goleng population by category           | 94      |
| Geog wise horse, mule and donkey population       | 95-101  |
| Geog wise pig population                          | 102-107 |
| Geog wise poultry population                      | 108-113 |
| Geog wise sheep and goat population               | 114-120 |
| Geog wise cat and dog population                  | 121-127 |
| Geog wise dairy production                        | 128-132 |
| Geog wise meat production                         | 133-137 |
| Geog wise egg and wool production                 | 138-144 |

# Forward

The Livestock Statistics 2009 is the fourth publication in the series of publications by the Department of Livestock in its comprehensive effort to record information on livestock animals and production in the kingdom of Bhutan.

In the current publication, the format has been changed to segregate the local cattle by their respective breeds. In earlier publications they were either clubbed under Nublang or Yaks.

## **The Publication is presented in two sections:**

1. Section I : contains livestock population and production data at Dzongkhag level. The data for the central farms are included under respective Dzongkhags.
2. Section II : contains livestock population and production data at Geog level. The data for the central farms are included under their respective Geogs.

We hope that the data will be useful, not only for the Livestock planners and researchers but also for the Policy makers, who are involved in the development of the RNR sector.

I would like to extend my heartiest appreciation to all my colleagues in the department and the Dzongkhag livestock sector, and in particular to the IMS of the department for their invaluable efforts in bringing out this useful and informative publication.

**Tenzin Dhendup**  
**Director General**

## **Objectives**

- To establish reliable information on livestock population and production for planning and monitoring of livestock development programmes.
- To provide data for preparation of plans and programs and to understand trends in livestock population and production.

## **Data collection, validation**

The data collecting format is designed by the IMS of the department and distributed to all the Dzongkhags. Data was collected from 205 geogs of the country at house hold level by the livestock extension personnel and also from the central farms of the department. The data validation and compilation is first done at the Geog level by the extension staff who collects the data then at dzongkhag level by the Dzongkhag Livestock Officer and forwarded to IMS of the department for further validation, compilation and publication..

## **Limitation on the data collected.**

- As our respondents are farmers with different social and educational background, the response errors are likely to be high although various techniques are used to get correct information.
- The farmers can not keep records of production figures due to low literacy level among the general population.
- Under reporting of population and production due to taxation is another source of error.
- Incompetent source of data can be another source of error.

## Summary of Livestock population 2009

| Dzongkhag       | Cattle        | Yak          | Buffalo    | Goleng      | Horse        | Mule        | Donkey     | Pig          | Poultry       | Sheep        | Goat         | Cat          | Dog          |
