Chapter 12 – Employment status by employment nature and completed level of education	78-82
Chapter 13 – Employment status by major occupation and employment nature	83-87
Chapter 14 – Employment status by additional job	88-94
Chapter 15 – Reasons for working more than 48 hours	95-97
Chapter 16 – Range of monthly earnings by major occupation	98-100
Chapter 17 – Unemployment status by age, sex and area of residence	101-103
Chapter 18 – Economically inactive population	104-106
Chapter 19 – Population by age, marital status and sex	107-112
Chapter 20 – Population by completed level of education	113-121
Chapter 21 – Migration	122-124

Labour Force Survey Report, 2010

FOREWORD

The Labour Market Information Division of the Department of Employment, Ministry of Labour and Human Resources (MoLHR) is pleased to publish the 8th National Labour Force Survey Report, 2010 conducted during March-April, 2010.

The stability and growth of the country's economy depend on the proper execution of planning and decision making. For this purpose, it is necessary to have a clear knowledge and understanding of the size, composition and economic characteristics of the population. Therefore, it is imperative to know and monitor the growth of human resources categorized by its respective demographic features and educational level on a timely basis.

The Ministry of Labour and Human Resources has been conducting the Labour Force Survey (LFS) since 1998. Since then, it has become a regular activity of MoLHR. The Department of Employment will conduct the Labour Force Survey annually to enable the Ministry to assess the current and emerging labour situation in the country.

We would like to express our deep appreciation and acknowledge for the cooperation received from the National Statistics Bureau (NSB). I would also like to extend special thanks to the Dzongkhag Administrations, the Thuemis, Gups, Geog Administrative Officers, Chupons, and Mang Aps for their generous cooperation and support rendered to our survey teams without which the survey would not have been possible.

I am hopeful that this survey report will be informative and a useful document to people working at all levels of administration, decision making, planning, research and other group of beneficiaries. Suggestions and comments are welcomed for its further improvement.

Labour Force Survey Report, 2010

INDICATORS

Sl.	Indicator	Year					
		2001	2003	2004	2006	2009	2010
1	Population distribution by age structure (%)						
	<15	36.4	35.5	31.3	30.8	31.2	30.5
	15-64	60.5	59.5	62.3	60.9	62.6	64.0
	65+	3.1	5	6.4	8.3	6.3	5.5
2	Rural-Urban Proportion (%)						
	Rural	69.7	73.6	73.1	72.6	75.5	69.2
	Urban	30.3	26.4	26.9	27.4	24.5	30.8
3	Male-Female Proportion (%)						
	Male	49.8	49.7	48	50.7	49.5	48.6
	Female	50.2	50.3	52	49.3	50.5	51.4
4	Labour Force Participation Rate (%)	56.5	62.9	54.4	61.8	68.5	68.6
i	By area						
	Rural	51.7	66.5	56	63.5	71.9	69.3
	Urban	66.4	52.3	49.7	57.2	63.2	67.0
ii	By gender						
	Male	75.2	72.6	67.5	69.8	72.8	73.6
	Female	38.4	53.6	42.7	53.9	64.6	63.9
5	Unemployment Rate (%)	1.9	1.8	2.5	3.2	4.0	3.3
i	By area						
	Rural	0.6	1.5	2.6	2.5	3.0	2.6
	Urban	4.1	2.9	2	4.9	7.5	5.1
ii	By gender						
	Male		1.6	2.1	2.6	2.6	2.7
	Female	3.2	2	3.3	3.8	5.4	4.0

Labour Force Survey Report, 2010

SECTION 1 - INTRODUCTION

Labour Force Survey is a regular activity of the Labour Market Information Division under the Department of Employment. It is conducted with a fixed reference period owing to which it is expected that there will be a slight variation in the activity. This is the 8th nationwide Labour Force Survey, which has covered a national representative of 12,000 households (urban=9000 & rural=3000). The survey covered more sample households in the urban areas because the urban population is more heterogeneous. The data includes demographic characteristics and economic characteristics.

1. METHODOLOGY

The statistics contained in this publication are based upon information obtained from 12,000 sampled households (Urban and Rural). Personal interviews were carried out in each representative household. Out of 12,000 dwellings drawn at random from an estimated population of 47,115 listed households, only 11,719 Households (questionnaires) were fully completed, giving 97.7% of completion rate. Of 12,000 households, 281 households were non-respondents giving 2.3% of incompleteness rate. The household listing had been established in 2005 from the Population Housing Census of Bhutan taken by the Office of the Census Commissioner (OCC).

2. OBJECTIVES & COVERAGE

Labour Force Survey aims to provide a quantitative framework for the preparation of plans and formulation of policies affecting the labour market.

Specifically, the survey is designed to provide statistics on levels and trends of employment, unemployment, labour force participation and various other socio-economic characteristics. Broadly the objective of the survey is to generate the following information:

- Percentage of economically active population
- Labour force participation rate
- Status of active population in number (employed + unemployed)
- The labour force available in the country by age group, sex, level of education, nationality, marital status, area of residence, by industrial and occupational classification, hours of work.
- The survey also provides information on main and subsidiary economic activities and women's participation in the total labour force. It also reveals the labour situation especially the young generation entering into labour market and unemployment problem.

The survey covered all the 20 Dzongkhags and 200 sampled chiwogs in the rural areas and 251 sampled blocks in the urban area. The foreign nationals and those members who were temporarily absent from the households but living in the institutions like school, hostels, army

Labour Force Survey Report, 2010

barracks, hospital and prisons were included. Concurrently, the survey excluded those members who were absent from the household for more than six months.

3. QUESTIONNAIRE

The questionnaire used for 8th Labour Force Survey is the revised form of 2009 Labour Force Survey questionnaire. This had been done by the group from the four Departments and Labour Market Information Division of the Ministry of Labour and Human Resources.

The questionnaire has been pre-tested and reviewed number of times to ensure its precision. The questionnaire comprises two parts, namely, the socio-demographic characteristics and economic characteristics. The economic characteristics is collected only from those persons aged 15 years and above as per the International Labour Organization (ILO) definition of economically active cohort of population. (A copy of the questionnaire is attached in the annexure for reference)

4. SAMPLE DESIGN

Universe: The universe for Labour Force Survey 2010 consists of all the urban and rural of Bhutan i.e all the 20 Dzongkhags

i. Sampling Frame: The sampling frame has been developed by the National Statistics Bureau. Each town in a Dzongkhag has been divided into numerous enumeration blocks. The block for the urban has been demarcated by the Department of Urban and Housing Development, Ministry of Works and Human Settlement. Enumeration blocks for urban and chiwogs for rural have been considered as Primary Sampling Unit (PSUs). The households in both urban and rural were considered as Secondary Sampling Unit (SSUs).

ii. Stratification Plan: Each Dzongkhag is considered as primary stratum the stratifying factors used were the geographical demarcation of the administrative boundaries carried by the Department of Survey & Land Records, Ministry of Agriculture. There were two sub-strata i.e urban and rural.

iii. Sample Design: A stratified two-stage sample design has been adopted for the survey.

- a. **Selection of primary sampling units (PSUs):** The blocks and the chiwogs have been taken as the PSUs in urban and rural respectively. In both the urban and rural areas the blocks and chiwogs were selected with Probability to Size (PPS) using Circular Systematic Sampling (CSS).
- b. **Selection of secondary sampling units (SSUs):** The households in the sampled blocks and chiwogs were considered as SSUs. A fixed number of sample households have been selected from the selected PSU's by CSS method.

Labour Force Survey Report, 2010

iv. Sample size and its allocation: Considering the availability of resources, the nature of population distribution and the variability of characteristics for which the estimates are to be made, a sample of 12000 households have been found appropriate to provide reliable estimate of key labour force characteristics. This is also based on the past experience.

Area	Bhutan	Sample for LFS 2010		Sampling Fraction
	Total no. of blocks/chiwogs	Blocks/chiwogs	Households	
Urban	281	251	9,000	1/4
Rural	1,906	200	3,000	1/29
Total	2,187	451	12,000	1/10

5. Distribution of sampled blocks/chiwogs and households under each Dzongkhag, 2010

Sl.	Name of Dzongkhag	Urban		Rural		Total
		Number of sample blocks	Number of sample households	Number of sample chiwogs	Number of sample households	Number of households
1	Bumthang	5	90	4	60	150
2	Chukha	54	1,845	14	210	2,055
3	Dagana	6	150	7	105	255
4	Gasa	1	60	3	45	105
5	Haa	4	150	4	60	210
6	Lhuntse	3	135	10	150	285
7	Mongar	13	300	15	225	525
8	Paro	5	195	10	150	345
9	Pemagatshel	11	195	10	150	345
10	Punakha/Khuru	1	120	9	135	255
11	Samdrupjongkhar	17	465	13	195	660
12	Samtse	18	510	22	330	840
13	Sarpang	16	510	9	135	645
14	Thimphu	66	3,060	5	75	3,135
15	Trashigang	9	270	26	390	660
16	Trongsa	3	150	5	75	225
17	Tsirang	2	120	7	105	225
18	Wangdue	6	345	12	180	525
19	Yangtse	4	195	8	120	315
20	Zhemgang	7	135	7	105	240
	Total	251	9,000	200	3,000	12,000

Note: Some blocks/chiwogs are selected twice and thrice etc. and will have to be adjusted in selection of households within the selected blocks/chiwogs.

Labour Force Survey Report, 2010

8. Field Operation: Ministry of Labour and Human Resources is the organization responsible for collection, processing, compilation and dissemination of labour statistics.

For maintaining the conformity of survey concepts, definitions and procedure to be used during enumeration, training for duration of 1 week was imparted to the concerned supervisors and enumerators on interviewing techniques and survey procedures to be used during the enumeration. For quality control, supervisors made frequent visits to the field for spot- checking during data collection process.

9. Method of data collection: Data have been collected by direct interview method. There were 111 enumerators in the field led by 13 supervisors. The information collected pertains to the reference period (one week before the actual date of the interview).

10. Non-response rate: Out of 12000 households, 281 were found as non-response which comes to 2.3%. One major source of non-sampling error is non-response. Non-response is caused due to absence of occupants in the sample house, may be due to total refusal to answer any of the questions and sometimes when the interviewee is incapable to answer.

11. Data Processing: Soon after data collection, the supervisors were made responsible to edit and check the filled in questionnaires for consistency and completeness and referred back to field where necessary. Further coding, manual checking and editing were done at the headquarters by the Labour Market Information Division. Also during data entry in CSPRO, further identified errors were edited by applying computer edit checks, data ranges in numerical values in order to eliminate erroneous data as result of mistakes made during coding. The survey records were edited and corrected through a series of computer processing stages.

Labour Force Survey Report, 2010

SECTION 2 - CONCEPTS & DEFINITIONS

In order to enable users to interpret the results from Labour Force Survey, it is essential to be familiar with the concepts used. The definitions and explanations for each of the key concepts are given below:

1. Reference period

Last one week prior to the date of enumeration has been used as the reference period for work activities.

2. Work

According to ILO standards and United Nations 1993 System of National Accounts, work includes any kind of works or businesses including collecting water or firewood, cow herding, tailoring or making mates, etc. even for the households' own consumption.

Examples of activities which are counted as a work

Activities counted as work

- Growing or gathering crops from the field, producing eggs, milk, food, cow herding, etc.
- Milling and other food processing activities, milling grains, making butter and cheese, brewing local wine, etc.
- Yarning and weaving clothes, making baskets and mats, peat making, tailoring, and making furniture, etc
- Construction of own house/buildings, major renovation of private roads and other private facilities.
- Fetching water, cutting or collecting firewood.
- Activities of a religious order such as a Rimdro, rituals etc.

Activities not counted as work

- Preparing and serving meals
- Unpaid family member (baby-sitting, training & instructing children, transporting household members/goods, repairing household durables, vehicles or other goods, etc.)

3. Study

Includes, those who are presently school going children, monks residing in the Dratshangs and Shedras and also those undergoing higher studies (Post Graduation, Ph.D, etc.)

4. Occupation

Occupation is the type of work, trade or profession performed by the person during the reference period.

Labour Force Survey Report, 2010

5. Industry

The term industry is used to refer the activity of the establishment in which the employed person worked during the reference period.

6. Nature of Employment

Nature of employment or employment status comprises the following codes:

1. Regular paid employee
2. Casual paid employee
3. Unpaid family worker (Non-agriculture)
4. Unpaid family worker (Agriculture)
5. Own account worker (Non-agriculture)
6. Own account worker (Agriculture)
7. Employer
8. Piece/Contract paid worker

6.1. Regular Paid employee: A person who performed some kind of work, during the reference period, for wage or salary, in cash or in kind.

6.2. Casual paid employee: Those employees who work as and when they find the job for which they get paid either in cash or in kind. Example: Gomchen who have performed rituals during the reference period, Lhadrip, etc.

6.3. Unpaid family worker (Non-agriculture): A person who helps in an economic enterprise operated by a member of his/her family without payment of wages or salary in the non-agriculture sector. (e.g. a daughter who helps in hand-loom weaving etc.)

6.4. Unpaid family worker (Agriculture): A persons who helps in an economic enterprise operated by a member of his/her family without payment of wages or salary in the agriculture sector. (e.g. wife who helps her husband in the apple farm or in cultivation or rice)

6.5. Own account worker (non-agriculture): A person who operates his own enterprise all alone in the non-agriculture sector and neither employs anybody to operate his/her enterprise nor employed by anybody. (e.g. petty-trader, advocate who practices independently etc.)

6.6. Own account worker (Agriculture): A person who operates his own enterprise all alone in the agriculture sector and neither employs anybody to operate his/her enterprise nor employed by anybody. (e.g. a farmer growing apple in his own land etc.)

6.7. Employer: A person who employs at least one person in his/her enterprise directly or through another person whom he pays in cash or in kind.

6.8. Piece/Contract paid worker: A worker who has a temporary contract to do a particular piece of work, but is not an employee of the company who they are working for.

Labour Force Survey Report, 2010

7. Employed

If a person has performed some paid work in cash or in kind, during the reference period for at least one hour or the person has a job or business formally attached but temporarily absent from the work and going to resume the work.

8. Unemployed

Unemployment is based on three categories which are to be followed simultaneously. They are; 'without work', 'available for work', and 'seeking work'.

Unemployed are those people who did not have a job or business or were not employed and performed one of the followings:

LFS 2010 Definition:

- Who did not perform any work for at least one hour during the past one week and one year prior to the survey period
- Who did not have a job or business from which they were absent during the past one week and one year prior to the survey period.

General Definition:

- Either who have looked for work during the date of interview.
- Or they did not look for work but they were available for work.
- They did not look for work because they thought that no work was available, or they were waiting for the results, or waiting to start work.

9. Earnings

It refers to the major or the main source of income through which the person earns a livelihood viz. wage, salary, bonuses, incentives and tips, etc.

Labour Force Survey Report, 2010

10. Household

Household is defined as a group of people who live together under one roof and eat their meals together from the same kitchen irrespective of relationship. A single person who makes his or her own food arrangements is counted as a separate household (one member household).

Who to include in the household member;

1. Those that usually reside in the household and are present on the day of interview.
2. Those who usually reside in the household but are temporarily absent/away from the household from the day of interview for less than six months (Excluding serial no. 3, since they had been away until the date of interview).
3. Those persons registered in the households but lives elsewhere, on labour work, studying including students & monks and also all military personnel who reside in the barracks.

11. Disable

A person is considered disable if they are found with the following;

1. Physically unfit for work
2. Mentally unsound
3. Blind
4. Deaf

12. Migration

The movement of people across a specific boundary for the purpose of establishing a new or semi permanent residence.

There are two types of migration:

1. International migration (movement between countries; immigration)
2. Internal migration (movement within the country; emigration)

Labour Force Survey Report, 2010

SECTION 3 – SUMMARY FINDINGS

The results of this survey are based on the data collected from 11,719 sample households enumerated during the period from 15th March, 2010 to 15th May, 2010. In order to facilitate computation and comparison, the results of labour force survey are presented in tables and charts. By using the survey weights for urban and rural separately, the survey population is estimated as **696,500** for the year 2010.

1. Population:

The labour force survey 2010 estimated the nation's population as 696,500 with 338,400 males and 358,200 females. Out of the total estimated population, 69.2% of the population resides in the rural areas compared to 75.5% residing in the rural areas in 2009 and 30.8% of the population are settled in urban areas whereas 24.5% were settled in the urban areas in 2009.

(Note: The population estimate of this report may differ from the population projection published by NSB due to different source)

Labour Force Survey Report, 2010

2. Marital Status:

The data on marital status has been collected according to classification of never married, married, widowed, divorced/separated and living together. The proportion of persons in each of the stated categories reported in the current survey compared with those reported in 2006 and 2009 survey is given in table 1. Detailed information is given at statistical appendix tables 19.0 to 19.5

Table 1: Percentage distribution of population by marital status, 2010 - Bhutan

Year/Status	Never married	Married	Widowed	Divorced/ Separated	Living together	Total
2006	52.5	42.4	3.6	1.5	0.0	100.0
2009	51.14	43.09	4.21	1.54	0.01	100.0
2010	49.0	46.1	3.0	1.7	0.3	100.0

Labour Force Survey Report, 2010

4. Employment Status:

Every job has been classified in terms of industrial activities, which refers to the production of main goods or services at the work place. Of the total employed persons, 59.4% were engaged in agricultural and forestry sector followed by wholesale and retail trade, repair of motor vehicle and household goods by 9.6% and public administration and defense by 8.0%. This pattern has been noted for both male and female workers separately. Employment in the non-farming activities has increased in general. A comparative picture of the proportions of persons employed in various major economic sectors is given in the table below.

Labour Force Survey Report, 2010

The currently employed persons are grouped into eight major categories of employment status i.e. regular paid employees, casual paid employees, unpaid family workers (non-agriculture), unpaid family workers (agriculture), own account worker (non-agriculture), own account worker (agriculture), employers and piece/contract paid worker. Table 6 indicates that out of the total employed persons; 41.5% are unpaid family workers. As expected more female workers (48.7%) are engaged as unpaid family worker compared to male workers (34.8%). Contrarily more male workers are engaged in the category of regular paid and casual paid categories.

Table 6: Percentage distribution of employed persons by sex & employment status, 2010 - Bhutan

Labour Force Survey Report, 2010

Of the currently employed persons, 49.8% worked for less than 30 hours a week. It is also observed that 13.7 % of the employed persons worked for 50-59 hours in a week and 11.3% of the employed persons worked for 40-49 hours a week.

However, 3.2% of the employed persons did not work for more than 39 hours in a week.

The table below depicts the statistical figures and proportions of employed persons by hours worked.

Table 7: Percentage distribution of employed persons by hours worked during the past one week prior to the survey period by sex, 2010 - Bhutan

Labour Force Survey Report, 2010

6. Labour Force Participation Rates:

The labour force participation rate has also shown an increase from 68.5% in 2009 to 68.6% in 2010. The labour force participation rate for male (the labour force as a percentage of the male working-age population) has also increased from 72.8% in 2009 to 73.6% in 2010. The female participation rate showed a slight decrease from 64.5% in 2009 to 63.9% in 2010.

The labour force participation rates are high across the rural areas (69.3%) compared to urban areas (67.9%). In the rural livelihood systems of the region, there is a strong economic need for everyone to work as for urban areas, higher incomes allow for the support of dependents, and greater educational opportunities encourage people to study longer. The pictorial presentation below illustrates the trend of labour force participation rates over the years.

Labour Force Survey Report, 2010

The table below shows the distribution of employed persons who tried to look for additional job during the survey period. Detailed information is given in chapter 14 of the national level labour force section.

Labour Force Survey Report, 2010

8. Unemployment Status:

Unemployed labour force is defined as the percentage of unemployed labour force to the total labour force. The unemployment rate has shown a decline from 4.0 % in 2009 to 3.3% in 2010. Females are highly unemployed (4.0%) compared to males (2.7%). The LFS 2010 statistics also reveal that more number of people are unemployed in the urban areas (5.1%) than rural areas (2.6 %). Higher rates of unemployment are observed in the ages between 15-19 and 20-24. The same pattern is observed for males and females separately. The youth unemployment rate has gone down from 12.9% in 2009 to 9.2% in 2010. The pattern of high unemployment in the early age groups indicates that these are the youths entering the labour market with certain level of education that are available for work or looking for work but lacks the required skills needed for immediate employment.

The graph below depicts the unemployment trends over the years.

Note: The rate for 2008 has not been included since there was no survey done during that year

Labour Force Survey Report, 2010
