Objectives and Structure

Part I (Summary)

- | | |
|--|----|
| I. Summary of Livestock Population 2019 | I |
| II. Summary of Livestock production 2019 | II |

Part II (Dzongkhag wise livestock population and production information) 1-27

Population (2019)

- Cattle Breeds (including Buffalo, Yak and Zo/Zom)
- Equines (Horse, Mule and Donkey)
- Pig and Poultry
- Sheep and Goat
- Cat and Dog (only utility dogs)

Production (2019)

- Dairy product produced and sold
- Meat product produced and sold
- Egg and Wool product produced and sold

Part III (Geog wise livestock population and production information) 28 - 288

Population (2019)

- Cattle population including (Buffalo, Yak and Zo-Zom)
- Equine (horse, mule and donkey)
- Pig and Poultry population
- Sheep and Goat population
- Cat and dog (utility/pet)population

Production (2019)

- Dairy product produced and sold
- Meat product produced and sold
- Egg, wool and honey product produced and sold

Part IV (Government Livestock Farms). 289-292

- Population and production (2019)

Foreword

Livestock Statistics 2019 is the 14th series of statistics publication by the Department of Livestock (DoL) in its comprehensive effort to record information on livestock population and production in the country for better planning and efficient resource utilization.

The Publication is presented in four section:

1. Part I contains overall summary (Livestock Population and Production 2019) in 20 Dzongkhags of Bhutan.
2. Part II contains detailed livestock population and production 2019 data at Dzongkhag level (20 Dzongkhag).
3. Part III contains livestock population and production 2019 data at the Gewog level (205 gewogs).
4. Part IV contains 2019 data in the Government livestock input farms.

We believe that this statistical data presented will be useful, not only for the planners, researchers, development works, but also for the policy makers. Further, the Department of Livestock in its upcoming annual report for 2019-2020 will provide a "Snap shot" of some vital statistical analysis and provide the rationale for the dynamics of the livestock population and production. It is our hope and aspiration that in making data available, it will be useful to all stakeholders to make evidence based decision for holistic RNR development in our country.

I would like to extend my heartiest appreciation to all my colleagues in the Department, Dzongkhag livestock sector, Government livestock input farms and in particular to Mr. Namgay Dorji and his colleagues under the Research and Extension Division, DoL for their invaluable efforts in bringing out this useful and informative publication in time.

Dr. Tashi Samdup (Ph.D)
DIRECTOR GENERAL

Methodological Processes

It is imperative that while collecting data, the process, methodology and validation are crucial to get valid data which can fulfil the objectives

- To record and maintain reliable information on livestock population and production for planning and monitoring of livestock development programmes.
- To provide data for preparation of plans and programs and to understand trends in livestock dynamics.

Data collection, validation

We designed a data collecting format (questionnaire) through participatory approach and fine tuned the format for the most relevant information record. Data is collected from 205 gewogs of the country at house hold level by the livestock extension personnel and also from the central farms of the Department. The data collection, validation and compilation is first done at the Geog level by the extension staff who then forward to Dzongkhag Livestock Officer where further validation is done. The Research and Extension Division (RED), under the Department of livestock, head quarter receives the final data for further validation, compilation and publication.

Limitation on the data.

As in any survey there are bound to be some limitations. Some of the limitations are as the respondents are farmers with different social and educational background, there will be some response errors although various techniques are used to obtain authentic data as far as possible. The farmers can not keep records of production figures due to low literacy level.

- Under reporting of population and production due to fear of taxation is another source of error.
- Incompetent data providers can be another source of error.

The Department of Livestock, none the less continue to strive to improve on the methodologies and provide authentic information for our end users

Namgay Dorji
Research and Extension Division
Department of Livestock

Part I

(Summary Livestock Population and Production 2019)

Back bone of Bhutanese farm economy

JATSHA

JATSAM

Introduction: Jatsa/ Jatsam are the F1 of the cross between a local cow (Thrabam) and mithun bull. The males (jatsa) are valued for their draught-ability and the females (jatsam) are prized milch animals due to the milk quantity and high percentage of fat content. They are referred to as Zang-nor meaning 'noble cattle'

Species: Bovine

Scientific Name: *Bos indicus*

Local Name: Jatsa (male) Jatsam (female)

Utility: males: Very powerful and agile draught animals. They are not used for breeding. Females: used for milking and breeding to obtain yangku and yangkums.

Distinguishing features: Features are similar to Mithun; high dorsal ridge, pendulous dewlap. Long horns with broad base, curve and sharp tips. Males are usually sterile.

Physical (body weight): bulls :450-500 kg cows:350-400 kg

Breeding structure: Jatsa: they are sterile.

Jatsams: Good breeders and are usually crossed with Nublangs to obtain good Yangkus and Yangkums.

Population: 32473(Livestock statistics 2019)
